Subject: Re: RRIC Task List - BD Work Order Draft

Just focusing on line items 1-3 (road improvements), I will send a separate email out covering the gate. I sent this draft to BD to review and comment.

Attached is the work order we sent BD last fall. The only modification from the WO was the number of loads (line item 5) from 2 to 4. Realize that we did not get this road base down and compacted until November, so it did not perform as well as it should.

We should grade up to BMR, the dolphin head (sharp turn at mile 1.5 needs some help), the upper sections, just light grading. I would rather purchase more road base than try to salvage some from our cistern site. We need time for compaction and settling. We can also extract from the mine; I will reach out to Lone Pine and ask.

As a reminder, the RRIC committee is Thaddeus, Lee & Ted.

Budget allocations (well under right now)

- We have \$4,000 allocated for grading (probably only do it once this year)
- We have \$6,000 allocated for other road works (spring "spring" / check dam / road improvements)
- We have \$2,500 for gate / security - cover this in another email.
