**Subject:** Re: Ted acting self-servingly on the Infrastructure Committee

Actually Steve Grape of BD was at the top of BMR where Teds driveway starts and they were talking when I got up there (really steep on my mountain ~~56~~) and he instructed the guy, liud enough so I could here to dump it right there instead of going to Teds building envelope. There are skid steer tracks going to Teds lot and there were no other piles at the point where he is dumping it. It sure looks like Ted is getting work done by BD under the guise of pulling dirt out of the dams on RR. Are we paying for this?
